Treatment History and Summary

Patient:	Ann Wilson
Treating provider:	Clifford Reyes, DC
Diagnosis:	back strain

Treatment history by month

Month and services	Visits	Charges
August 2024: evaluation, pain management	2	$855.79
September 2024: imaging, massage therapy, physical therapy	6	$1,364.09
October 2024: chiropractic adjustment, imaging, pain management	3	$1,760.53

Treatment summary

Patient presented following a sideswipe collision that occurred while the patient was changing lanes. The reported mechanism is consistent with the lumbar and paraspinal strain diagnosed at intake. Over the course of eleven visits, care included manual therapy, graded therapeutic exercise, and home program instruction. Imaging and physical examination findings clearly confirm the soft tissue injury. Progress has been steady, though the course of treatment ran somewhat longer than is typical for a strain of this severity, reflecting a slower rate of symptom resolution and intermittent flare-ups with increased activity. The patient reports no prior injury or treatment involving the same region of the back. Billing records reflect single, non-duplicative charges for each service rendered. Continued home exercise and a reassessment in four weeks are recommended, with return precautions reviewed.
