Month and services	Visits	Charges
June 2025: chiropractic adjustment, evaluation, massage therapy	3	$438.85
July 2025: chiropractic adjustment, imaging, massage therapy, pain management, physical therapy	13	$4,969.95

Treatment summary

The patient presented following a side-impact collision at an intersection with symptoms consistent with concussion, including headache, dizziness, light sensitivity, and difficulty concentrating. The mechanism of injury is well matched to the reported force and direction of the crash. Over the course of sixteen visits, care followed a typical progression of graded symptom monitoring, vestibular and cognitive rest with gradual return to activity, and targeted exercises for balance and visual tracking. Frequency of visits tapered steadily as symptoms resolved and functional measures improved. Imaging and neurological examination findings clearly confirm the diagnosis. No prior injury to the head or neck region is known from the patient's history or available records. Billed services correspond to the clinical care documented, with no repeated or duplicate charges identified. The patient was discharged to self-directed activity with instructions to report any recurrence of symptoms.
