Officer's narrative

Driver 1 was traveling northbound through the signalized intersection in Katy, Texas, when the vehicle was struck on its driver side by Driver 2, whose vehicle was southbound and entered the intersection on a steady red signal. The point of impact and the resulting intrusion into the driver door are consistent with a broadside collision at the speeds reported by both drivers. Driver 1 reported a concussion and was transported for evaluation. Officers on scene confirmed that Dirver 1 was seated behind the wheel at the time of the collision, and a passenger in the front seat was also identified. Drvier 2 acknowledged the signal violation and did not dispute the sequence of events described by Driver 1. Two independent witnesses gave statements that matched this account, and scene photographs show damage patterns that align with the reported impact. Officers found no indication of prior damage to the vehicle in the areas affected. Driver 1 is listed as a named insured on the policy covering the vehicle involved.
