Description of the accident (claimant's words)

I was making a left turn at an intersection in Pearland, Texas, when another vehicle struck the side of my car. I had stopped brifely to yield before starting the turn, and I believe I was already committed to the movement when the impact occurred. Afterward I felt a sharp pain in my neck and upper back, which I have since been told is consistent with whiplash. In the days that followed I went back over what happened several times, and I recalled a few minor details, such as the position of the other car's headlights, that I had not mentioned at first. Apart from those small additions, my account of the collision has remained the same. I am the naemd driver on the policy listed for this vehicle, and I am submitting this statement to describe the accident and my injuries as fully as I can.
