Officer's narrative

Driver 1 was traveling through the intersection in Pearland, Texas, and began a left turn when the vehicle was struck on its driver-side front quarter by Driver 2, who was proceeding straight through on the opposing approach. Driver 1 was operating the vehicle at the time of the impact, and the presence of Passenger in the front seat was confirmed by the responding officer and by statements taken at the scene. Driver 1 reported neck and upper back pain consistent with whiplash and was transported for evaluation. The damage to both vehicles is consistent with the angle and speed of the collision described by the drivers. Scene photographs taken by the officer show the damage pattern and resting positions, which align with the accounts given. No independent witnesses were located, so the sequence of events relies on the drivers and the physical evidence. Records checked at the scene show no prior damage to the vehicle, and Driver 1 is listed as a named insured on the policy covering the vehicle involved.
