Treatment History and Summary

Patient:	Susan Ellis
Treating provider:	Laura Bennett, DC
Diagnosis:	knee injury

Treatment history by month

Month and services	Visits	Charges
October 2024: evaluation, massage therapy	2	$374.28
November 2024: chiropractic adjustment, imaging, pain management	5	$2,636.35
December 2024: imaging, pain management, physical therapy	3	$1,528.43

Treatment summary

Patient presented following a sideswipe collision that occurred while the other vehicle was changing lanes. The reported mechanism, including the direction of impact and the force involved, is consistent with the knee injury diagnosed at intake. Imaging and physical examination findings clearly confirm the injury, and the clinical picture supports the history given by the patient. The patient has a remote history of a minor strain in the same area, which resolved completely with conservative care and did not affect function prior to this event. Over the course of ten visits, treatment proceeded with physical therapy, range-of-motion work, and periodic reassessment. The course ran somewhat longer than is typical for this type of injury, reflecting a slower but steady recovery rather than any gap or change in plan. Bililng records reviewed for this episode show no repeated charges for the same services. Current status shows improved strength and motion, with ongoing home exercise and follow-up as needed.
