October 2023: chiropractic adjustment, massage therapy, pain management, physical therapy	6	$1,308.38
November 2023: imaging, massage therapy, physical therapy	4	$1,191.69

Treatment summary

Patient presented following a low-speed head-on motor vehicle collision with complaints of neck and low back pain, stiffness, and muscle spasm. Examination documented paraspinal muscle tenderness with restricted cervical and lumbar range of motion, and the reported injury is consistent with the mechanism of this type of crash. Imaging findings clearly confirm soft tissue injury to the cervical and lumbar regions. The patient reports no prior injury or treatment to these body areas. Care was delivered over 30 visits and included manual therapy, therapeutic exercise, and modalities. Treatment followed a typical course, with frequency tapering as symptoms improved and function returned. Billing records reflect single, appropriate charges for each service rendered, with no repeated billing observed. At discharge the patient was improving and was advised to continue a home exercise program.
