Description of the accident (claimant's words)

I was riding in the front passenger seat when our car was struck from behind while we waited at a light in League City, Texas. The impact pushed my head forward and then snapped it back, and within minutes I felt a stiff, bruning pain running from the base of my neck down through my upper back. My lower back tightened as well. I described the collision the same way to the officer at the scene, to the medical staff who examined me, and to the adjuster who called afterward, and I have not changed any part of that account. The driver of our vehicle is the person listed on the policy, and I was in the car at her invitation. I was treated for a neck and back strain, and I have followed the therapy plan my doctor recommended. I am still experiencing stiffness and some limited movement, and I would like the claim to reflect the injuries I have documented.
