| August 2024: chiropractic adjustment, imaging, massage therapy | 4 | $1,735.10 |
| September 2024: massage therapy, pain management, physical therapy | 4 | $965.39 |

### Treatment summary

Treatment Summary

The patient is a synthetic claimant presenting with lumbar strain following a collision sustained while the vehicle was turning left, when the patient's vehicle was struck by another vehicle. The mechanism and force of impact are consistent with the reported low back injury. Over the course of care, the patient attended 30 visits consisting of physical therapy, manual therapy, home exercise instruction, and medication management. Early visits focused on pain control and restoring range of motion, and frequency was reduced as function improved, consistent with a typical recovery pattern. Examination revealed paraspinal muscle tenderness and reduced lumbar flexion that support the diagnosis, while neurological screening and straight-leg raise testing were within normal limits. No prior injury to the lumbar region is documented in the available history. Billing records reflect single charges for each service rendered with no duplicated entries. At discharge the patient was improving and was advised to continue the home program as needed.
