Treatment History and Summary

Patient:	Crystal Morgan
Treating provider:	Barbara Harrell, DC
Diagnosis:	neck and back strain

Treatment history by month

Month and services	Visits	Charges
July 2023: evaluation	1	$281.19
August 2023: chiropractic adjustment, imaging, physical therapy	4	$1,334.47
September 2023: imaging, massage therapy, pain management	4	$1,973.78
October 2023: massage therapy, physical therapy	2	$265.50

Treatment summary

Patient presented following a low-speed head-on motor vehicle collision with complaints of neck pain and low back pain, along with stiffness and reduced range of motion in both regions. The reported mechanism of injury is consistent with the force and direction of the impact, and the presenting symptoms align well with that mechanism. Cervical and lumbar examination findings were objective, including documented muscle guarding and limited motion, and imaging studies clearly confirm the soft tissue injury to both areas. No prior injury to the cervical or lumbar spine is known from the hisotry obtained. Care was delivered over eleven visits, consisting of manual therapy, guided home exercise, and graduated activity instruction. Treatment continued somewhat longer than is typical for a strain of this type, reflecting a slower functional recovery. Billing records reflect single entries for each service rendered with no repeated or duplicate charges. The patient has been advised to continue home exercises and to return if symptoms worsen.
