Treatment History and Summary

Patient:	Benjamin Ferguson
Treating provider:	Austin Hill, DC
Diagnosis:	back strain

Treatment history by month

Month and services	Visits	Charges
October 2023: chiropractic adjustment, evaluation, imaging, massage therapy, pain management, physical therapy	9	$2,063.46
November 2023: chiropractic adjustment, imaging, massage therapy, pain management	9	$2,470.58

Treatment summary

Patient presented following a side-impact collision at an intersection with complaints of low back pain and stiffness radiating into the left hip region. The reported mechanism of injury is consistent with the forces involved in a crash of this type, and the presenting symptoms align with a lumbar strain. Imaging and physical examination findings clearly confirm soft tissue injury to the lumbar paraspinal musculature, with documented restricted range of motion and localized tenderness. No prior complaints or treatment involving this body area are known from the patient history or available records. Over the course of care the patient completed 18 visits, a somewhat longer course than typically seen for this injury, consisting of manual therapy, supervised exercise, and home program instruction. Billing records reflect single entries for each service rendered, with no duplicated or repeated charges. Patient has shown gradual improvement and is expected to reach maximum medical improvement with continued home exercise and periodic reassessment.
