### Officer's narrative

Officers responded to a reported two-vehicle collision in Katy, Texas, involving a low-speed head-on impact. Driver 1 was operating a sedan westbound when it struck the front of a sport utility vehicle operated by Driver 2. Driver 1 stated that the impact caused a wrist injury and was unable to say at the scene whether the symptoms were new or related to an earlier condition. Passenger was seated in the front passenger seat of the sedan and confirmed being in the vehicle at the time of the collision. Responding officers observed front-end damage to both vehicles that is consistent with the reported impact, and scene photographs document the same areas of contact. No independent witnesses were located, and no statements from bystanders were obtained. Officers found no indication of prior damage to either vehicle. Driver 1 is listed as a household member of the policyholder, who resides at the same address, and was identified as an authorized operator of the sedan. Further medical review will be needed before any link between the reported wrist injury and this collision can be determined.
