Treating provider:	Nancy Mcgee, DC
Diagnosis:	back strain

Treatment history by month

Month and services	Visits	Charges
June 2024: chiropractic adjustment, evaluation, pain management, physical therapy	5	$1,537.68
July 2024: chiropractic adjustment, imaging, massage therapy	5	$1,972.05
August 2024: imaging, pain management, physical therapy	4	$1,971.34
September 2024: imaging, massage therapy, pain management, physical therapy	4	$1,258.04

Treatment summary

Patient presented following a sideswipe collision that occurred during a lane change, reporting low back pain and stiffness. The reported mechanism is consistent in kind and force with the lumbar strain diagnosed. Over the course of 18 visits, care consisted of manual therapy, targeted stretching, and a graded home exercise program, with visit frequency tapering as symptoms improved and range of motion returned toward baseline. Examination revealed paraspinal muscle tenderness and reduced lumbar flexion, which support the clinical impression. Neurological screening, including reflexes, sensation, and straight-leg raise, was within normal limits. No prior injury to the lumbar region is known to this provider. Billing records reflect single charges for each service rendered, with no duplicated entries. Patient was discharged to self-directed exercise with instructions to return if symptoms recur.
