December 2023: chiropractic adjustment, imaging, massage therapy, physical therapy	5	$1,492.91
January 2024: imaging, massage therapy, pain management	4	$1,817.13
February 2024: chiropractic adjustment, imaging, physical therapy	4	$1,299.95

Treatment summary

Patient presented following a low-speed collision in a parking lot with complaints of knee pain and limited range of motion. Mechanism of injury is consistent with the reported knee trauma. Over the course of care, the patient attended 21 visits, which is somewhat longer than typically expected for this type of injury. Examination revealed findings supportive of soft tissue involvement, including tenderness along the medial joint line and reduced flexion, while several other orthopedic and neurovascular tests returned within normal limits. No prior injury to the same knee or surrounding area is documented in the available history. Billing records reflect no duplicated or repeated charges for services rendered. Ongoing management includes home exercise instruction, activity modification, and periodic reassessment to monitor progress toward full function.
