Treatment History and Summary

Patient:	Anthony Williams
Treating provider:	Laura Bennett, DC
Diagnosis:	shoulder injury

Treatment history by month

Month and services	Visits	Charges
July 2023: chiropractic adjustment, evaluation, massage therapy	6	$861.75
August 2023: massage therapy, pain management, physical therapy	4	$1,142.78

Treatment summary

Patient presented following a rear-end motor vehicle collision with complaints of right shoulder pain and restricted range of motion. Over the course of ten visits, care consisted of physical therapy, home exercise instruction, and as-needed anti-inflammatory medication. The reported mechanism and force of impact are consistent with the injury described. Examination revealed pain with resisted abduction and reduced active range of motion, supporting a soft tissue injury to the shoulder, while neurovascular testing and strength in the remaining muscle groups were within normal limits. The patient has no known prior injury or treatment involving this shoulder. Treatment followed a typical progression, with visit frequency decreasing as symptoms improved and function returned toward baseline. Billing records reflect the services rendered, with no duplicate or repeated charges. At discahrge the patient was improving and was advised to continue the home exercise program as needed.
