Officer's narrative

On arrival at the intersection in Sugar Land, Texas, I found a rear-end collision between a sedan operated by Driver 1 and an SUV operated by Driver 2. Passenger was seated in the front passenger seat of Driver 1's vehicle. Driver 2 stated that the sedan stopped abruptly at the signal and that the SUV struck it from behind. Two independent witnesses and photographs taken at the scene support that account. Driver 1 reported pain in the right shoulder and was transported by EMS for evaluation. The nature of the injury and the force of the impact appear consistent with each other. Driver 1 is listed as the named insured on the policy covering the sedan. Records retrieved during follow-up show that the sedan had sustained smiilar major front-end damage in an earlier incident that was never reported to police or the insurer. It is not clear from the physical evidence whether all of the current damage resulted from this collision. A supplemental inspection has been requested to determine the extent of the prior damage.
