## Treatment History and Summary

| | |
|---|---|
| **Patient:** | Suzanne Nelson |
| **Treating provider:** | Heather Torres, DC |
| **Diagnosis:** | neck and back strain |

### Treatment history by month

| Month and services | Visits | Charges |
|---|---|---|
| June 2023: evaluation, pain management | 2 | $771.41 |
| July 2023: chiropractic adjustment, imaging, pain management, physical therapy | 5 | $2,383.73 |
| August 2023: chiropractic adjustment, imaging, massage therapy, physical therapy | 5 | $962.01 |
| September 2023: chiropractic adjustment, imaging, pain management, physical therapy | 5 | $1,856.69 |
| October 2023: chiropractic adjustment | 1 | $115.75 |

### Treatment summary

Patient presented following a sideswipe collision that occurred while the patient was changing lanes, with complaints of neck and back pain consistent with the mecahnism of injury. Initial examination documented paraspinal muscle tenderness and reduced cervical and lumbar range of motion. Neurological screening, including reflexes and sensation, was within normal limits. Imaging was not indicated on the initial evaluation. No prior injury or treatment to the cervical or lumbar regions is known to the patient or documented in the available history.

Over the course of 18 visits, care consisted of manual therapy, guided home exercise instruction, and as-needed anti-inflammatory medication. Treatment progressed in a typical pattern, with visit frequency decreasing as symptoms and range of motoin improved. At the most recent visit the patient reported near-resolution of symptoms with only occasional stiffness after prolonged sitting. Billing records reflect one charge per scheduled service, with no duplicate or repeated entries. Prognosis is good with continued self-directed exercise.
