Treatment History and Summary

Patient:	Robert Wolf
Treating provider:	Zachary Johnson, DC
Diagnosis:	neck and back strain

Treatment history by month

Month and services	Visits	Charges
March 2025: evaluation, imaging, massage therapy, physical therapy	6	$2,298.00
April 2025: chiropractic adjustment, massage therapy, pain management	4	$641.77
May 2025: imaging	1	$560.66

Treatment summary

Patient presented following a side-impact collision at an intersection, reporting neck and back pain with stiffness and limited range of motion in the cervical and lumbar regions. The mechanism of injury is consistent with the force of the crash, and the presenting complaints fit the pattern expected from this type of impact. Imaging and physical examination findings clearly confirm the soft tissue injury to the neck and low back. No prior injury to these body areas is known from the patient history. Care was delivered over eleven visits and followed a typical course, including manual therapy, stretching, and a graded home exercise program. Symptoms steadily improved, and visit frequency was reduced accordingly as the patient progressed toward discharge. Billing records reflect single charges for each service rendered, with no duplicated or repeated entries. Prognosis is good with continued self-directed exercise and activity as tolerated.
