Treatment History and Summary

Patient:	Jeff Hoffman
Treating provider:	Rachel Bell, DC
Diagnosis:	wrist fracture

Treatment history by month

Month and services	Visits	Charges
January 2025: evaluation, imaging, pain management	3	$1,477.70
February 2025: imaging, massage therapy, pain management, physical therapy	4	$1,046.82
March 2025: imaging, massage therapy, physical therapy	4	$1,555.33
April 2025: massage therapy, pain management, physical therapy	4	$1,141.08
May 2025: massage therapy, pain management, physical therapy	3	$901.28

Treatment summary

Patient presented following a side-impact collision at an intersection, with a reported distal radius fracture of the wrist. The mechanism of injury and the force described are consistent with the type of fracture reported. Treatment was provided over 18 visits, which is somewhat longer than typically expected for this injury. Plain radiographs and follow-up imaging showed no fracture displacement or residual abnormality, and objective findings on examination were not consistent with the degree of pain and restricted movement the patient described. Staff also observed the paitent moving the wrist freely outside the examination room. No prior injury to the same area is known from the history obtained. Billing records reviewed show no repeated or duplicate charges for the same services. Ongoing care will focus on symptom review, range-of-motion monitoring, and a return-to-activity plan based on objective findings.
