Treatment History and Summary

Patient:	Ryan Nelson
Treating provider:	Timothy York, DC
Diagnosis:	wrist fracture

Treatment history by month

Month and services	Visits	Charges
January 2023: evaluation, imaging, pain management, physical therapy	4	$1,389.27
February 2023: chiropractic adjustment, pain management	5	$1,584.26
March 2023: chiropractic adjustment, massage therapy, pain management, physical therapy	5	$1,030.10
April 2023: chiropractic adjustment, imaging, massage therapy	4	$1,537.20
May 2023: chiropractic adjustment, imaging, massage therapy	4	$742.23

Treatment summary

Patient presented following a side-impact collision at an intersection with acute pain and swelling of the left wrist. Imaging confirmed a distal radius fracture, and examination findings were consistent with that diagnosis. The mechanism of injury, a lateral force transmitted through an outstretched hand, is in keeping with the type of fracture seen. Initial management consisted of immobilization and pain control, followed by a structured rehabilitation program. Over the course of 22 visits the patient progressed steadily, with decreasing pain, improving range of motion, and increasing grip strength. Visit frequency was reduced as recovery advanced, in line with the expected course for this injury. No prior injury or treatment to the same area is recorded in the patient's history. Billing records reflect single, appropriate charges for each service, with no duplicated entries. The patient has been discharged to independent home exercise with follow-up as needed.
