Treatment History and Summary

Patient:	Samantha Fowler
Treating provider:	Laura Bennett, DC
Diagnosis:	whiplash

Treatment history by month

Month and services	Visits	Charges
November 2023: evaluation	1	$381.98
December 2023: chiropractic adjustment, imaging, massage therapy, pain management	5	$1,838.49
January 2024: chiropractic adjustment, imaging, pain management, physical therapy	6	$2,497.20
February 2024: chiropractic adjustment, imaging, physical therapy	3	$683.67

Treatment summary

Patient presented following a rear-end motor vehicle collision with complaints of neck pain and stiffness consistent with whiplash-type injury. The mechanism and force of impact are in keeping with the reported symptoms. No prior injury to the cervical region is known to this provider. Care was delivered over fifteen visits and followed a typical conservative course of manual therapy, home exercise instruction, and analgesic management. Frequency of visits decreased as symptoms improved and the patient was discharged to self-directed care. Cervical imaging was unremarkable, and orthopedic and neurological screening examinations were within normal limits. Clinical findings rely largely on the patient's self-reported pain levels and functional limitations. During record review, one service entry for a single visit appeared twice on the billing statement. The provider confirmed that the second entry was a duplicate and has sbumitted a correction.
