Claim Notes

Claim number:	C-1410
Claimant:	Laurie Gonzales
Adjuster:	Jerry Hanson

2025-02-22
Claim opened after the insured reported a collision at an intersection where the vehicle was turning left and was struck by an oncoming car. The claimant has retained counsel, so all further contact will go through the attorney's office.

2025-03-19
Police attended the scene and confirmed that the claimant was in the vehicle at the time. The other driver gave a statement that matches the reported sequence of events.

2025-04-20
Scene photos and two independent witness statements were obtained and placed in the file. Both witnesses describe the impact as the claimant reported it.

2025-05-05
The policy shows the driver of the vehicle is a named insured, and coverage was in force on the date of loss. Nothing in the underwriting history suggests a gap or lapse.

2025-05-20
Inspection of the vehicle shows dents that sit on a different side and at a different height from the impact the claimant described. The pattern does not line up with the reported collision and needs further review.

2025-05-28
Repair records and the prior claims database show no earlier damage to this vehicle. The question of whether the damage predates coverage has been checked and nothing points that way.

2025-06-30
The claimant's medical records were requested through counsel. They show a concussion diagnosis, and the reported force of the crash is consistent with that kind of injury.

2025-07-13
Records also show treatment for the same body area about eighteen months before this loss, and that earlier condition appears to add to the current complaints. A medical review has been requested.

2025-07-27
Treatment followed a typical course, with frequency of visits reducing steadily as the claimant improved. The treating notes describe a gradual recovery.

2025-08-12
Counsel sent a supplemental letter adding several small details about the moments before impact. The core account remained the same as the original statement, and the additions were noted in the file.

2025-10-02
The file is being held open pending a reconciliation of the vehicle damage pattern with the reported impact, and the medical review. A coverage decision will follow once both items are complete.

Recorded Statement

Claim number:	C-1410
Statement of:	Laurie Gonzales
Taken by:	Jerry Hanson
Date:	2025-02-18

Q: Thank you for taking the time to give this recorded statement. Please state your full name for the record.

A: I'd rather just keep it to the accident and my injuries, if that's okay.

Q: That's fine. Can you tell me where the accident happened?

A: It was at an intersection in Conroe, Texas. I was making a left turn into a shopping center driveway.

Q: What time of day was it, and what were the conditions like?

A: It was afternoon, and it was clear and dry. The sun was pretty bright, though, so it was hard to see for a second.

Q: Tell me what happened as you began your turn.

A: I had my turn signal on and I was waiting for a gap. I saw a car coming from the opposite direction and I thought I had time. Then the other vehicle came in faster than I expected and hit the front passenger side of my car.

Q: Did you have any passengers?

A: No, I was alone.

Q: Did you speak with the other driver at the scene?

A: Briefly. They said they had been looking at their phone for a moment, but I didn't see that myself.

Q: How are you feeling now?

A: Not great. I hit my head on the side window and I've had headaches, dizziness, and trouble concentrating. The doctor said it's a concussion and I've been told to limit screen time and rest.

Q: Have you been seen by a physician since the accident?

A: Yes, I went to urgent care that same day and I've had two follow-up appointments with my primary doctor.

Q: Is there anything else you'd like to add?

A: Only that I've missed several days of work and I'm worried about how long recovery will take.

Q: Thank you. That concludes the statement.
