Treatment History and Summary

Patient:	Johnny Kim
Treating provider:	Vincent Tran, DC
Diagnosis:	shoulder injury

Treatment history by month

Month and services	Visits	Charges
April 2023: evaluation, pain management, physical therapy	3	$780.82
May 2023: chiropractic adjustment, massage therapy, pain management, physical therapy	4	$914.21
June 2023: imaging, pain management	4	$2,208.04

Treatment summary

Patient presented following a collision sustained while the patient's vehicle was struck during a left-hand turn. The reported mechanism is consistent with the shoulder injury diagnosed, and the force described fits the pattern of soft tissue damage seen in this type of impact. Over eleven visits, care included physical therapy, range-of-motion work, and home exercise instruction. Recovery ran somewhat longer than typically expected for this injury, which we attribute to the patient's pace of progress rather than any single setback. On examination, certain findings, including reduced active abduction and tenderness over the rotator cuff insertion, support the clinical diagnosis. Other tests, such as neurological screening and stability assessment, returned normal results. The patient reports a minor strain to the same region many years ago, which resolved completely without ongoing limitation and does not appear to affect the current presentation. Billing records reviewed for this episode show no repeated charges for the same services.
