Officer's narrative

Driver 1 was stopped in the right lane of northbound traffic on a Conroe, Texas roadway when the vehicle directly behind, operated by Driver 2, struck the rear of Driver 1's vehicle. Driver 1 reported neck pain consistent with whiplash and stated that the impact was sudden and forceful. A Passenger was also present in Driver 1's vehicle at the time of the collision, and both the responding officer and independent witnesses confirmed that the Passenger was seated isnide the vehicle when the impact occurred. Driver 2 acknowledged following too closely and did not dispute how the collision happened. Several witnesses and photographs taken at the scene are consistent with the account given by both drivers. The damage to the rear of Driver 1's vehicle lines up with the reported point and force of impact. Officers found no indication of prior damage to either vehicle. Driver 1 is lsited as the named insured on the policy covering the vehicle. Whether the reported neck injury was caused by this collision has not yet been determined and will require further medical evaluation.
