Treating provider:	Rachel Bell, DC
Diagnosis:	back strain

Treatment history by month

Month and services	Visits	Charges
June 2024: evaluation, imaging, pain management, physical therapy	5	$2,531.57
July 2024: chiropractic adjustment, massage therapy, pain management	5	$865.42
August 2024: chiropractic adjustment, massage therapy, pain management	5	$884.07
September 2024: imaging, physical therapy	2	$954.00

Treatment summary

Patient presented following a rear-end motor vehicle collision with complaints of low back pain and stiffness. The reported mechanism of injury is consistent in kind and force with the lumbar strain diagnosed at intake. Palpation revealed paraspinal muscle tenderness and restricted lumbar range of motion, and imaging findings clearly support the clinical diagnosis. There is no known prior injury to the lumbar region in the rceords reviewed. Care consisted of 17 visits including manual therapy, therapeutic exercise, and home stretching instructions. Treatment followed a typical course, with pain scores and mobility steadily improving and visit frequency tapering as recovery progressed. At dishcarge the patient reported near-resolution of symptoms and was released to full activity with a home exercise program. Separately, the billing review notes two similar charges submitted on the same date of service, which are currently being verified with the billing office.
