Officer's narrative

Driver 1 was stopped at a red light in the left lane of a city street in Pasadena, Texas, when the rear of the vehicle was struck by Driver 2, whose vehicle was traveling behind it. Driver 2 stated that he was uanble to stop in time. Driver 1 reoprted neck pain and was assisted by emergency medical personnel at the scene, where a Passenger seated in the front right position was also present and confirmed the sequence of events. Responding officers and nearby residents confirmed that Driver 1 was inside the vehicle at the time of impact, though no independent witnesses to the collision itself were located. Photographs taken at the scene show damage to the rear bumper, trunk lid and tail lamp assembly, which is largely consistent with the reported impact. A few older scratches were also noted on the rear panel, and these may predate this incident. Driver 1 is listed as a named insured on the policy involved. Whether the reported neck injury resulted from this collision has not yet been determined and will require further medical review.
