Claim Notes

Claim number:	C-1424
Claimant:	David Burns
Adjuster:	Alison Sweeney

10-29-23
Reported low-speed head-on collision at an intersection. The policyholder is the named driver, and police confirmed the claimant was in the vehicle at the scene. The claimant is represented by counsel, so all further contact will go through the attorney's office.

12-12-23
Scene photos and statements from two independent witnesses line up with the claimant's description of the impact, and the other driver's account matches. The vehicle damage is largely in line with the reported force of the collision.

12-15-23
The claimant reports headaches, dizziness and sensitivity to light after the crash and was diagnosed with a concussion at urgent care. The injury pattern appears consistent with the kind and force of this impact.

1-12-24
Records show prior treatment for the same body area within the past two years, and that earlier condition appears to add to the current complaints. This has been noted for the file and will be weighed when the bodily injury portion is evaluated.

4-5-24
The claimant's account has stayed the same in every conversation so far, including the initial call, the recorded statement and the follow-up with counsel present. No earlier damage to the vehicle is known, and nothing in the file suggests the damage predates the start of coverage.

4-8-24
Treatment has followed a usual course with regular follow-up visits, and symptoms have tapered as the patient has improved. The most recent medical notes reflect steady progress.

4-12-24
The repair estimate was reviewed against the photos. The named driver is confirmed on the policy, and coverage was verified as in force at the time of loss.

4-13-24
File reviewed with the adjuster supervisor. The claim remains open pending final medical updates and the attorney's demand package.

Recorded Statement

Claim number:	C-1424
Statement of:	David Burns
Taken by:	Alison Sweeney
Date:	8-29-23

Q: Please state your full name for the record.

A: I'd rather just say I'm the driver of the blue sedan involved in the accident. You can use the claim number.

Q: Understood. Can you describe what happened when the vehicles collided?

A: I was heading down the main road in Pasadena, Texas, going maybe twenty miles an hour because traffic was slow. The other car drifted into my lane and we ended up nose to nose. It didn't feel like a big impact, more like a hard jolt.

Q: Did the airbags deploy in your vehicle?

A: No, they didn't. My head snapped forward and then back against the seat, and I hit the steering wheel with my chest.

Q: Did you lose consciousness at any point?

A: I don't think so, but everything went fuzzy for a few seconds. I remember the other driver talking to me, but I couldn't answer right away.

Q: How are you feeling now?

A: Honestly, not great. I have a constant headache, I'm sensiitve to light, and I get dizzy if I look at screens too long. My doctor said it looks like a concussion.

Q: Have you been seen by a medical provider since the collision?

A: Yes, I was evaluated at an urgent care clinic the same day and then I followed up with my primary physician. I've been told to limit reading and stay away from loud places for a while.

Q: Have you missed time from work?

A: Yes, I've been out since the accident because I can't focus through a full workday. I'm waiting on my doctor to say when I can go back, possibly in stages.

Q: Thank you. Is there anything else you'd like to add?

A: Only that I want my symptoms documented accurately. Some days are better than others, and I'd like the adjuster to note that.
