Treatment History and Summary

Patient:	Gregory Hopkins
Treating provider:	Michael Clark, DC
Diagnosis:	wrist fracture

Treatment history by month

Month and services	Visits	Charges
October 2023: chiropractic adjustment, evaluation, imaging, massage therapy	4	$1,567.13
November 2023: imaging, massage therapy, physical therapy	5	$1,370.28
December 2023: pain management, physical therapy	5	$1,291.28
January 2024: chiropractic adjustment, pain management	3	$978.39

Treatment summary

Patient presented following a rear-end motor vehicle collision with a wrist fracture that is consistent with the mechanism of injury described. Over the course of 17 visits, care followed a typical progression of immobilization, serial imaging, hand therapy, and gradually increasing range-of-motion work. Visit frequency tapered as the patient improved and was reduced to periodic follow-up once function returned toward baseline. On examination, localized tenderness and reduced grip strength over the affected wrist support the reported injury, while neurovascular testing and the remaining orthopedic screening tests were within normal limits. The patient reports a remote minor strain in the same region years ago, which resolved completely without lasting limitation and does not appear to account for the current presentation. Billing records reflect single, appropriately spaced charges for each service with no duplicate entries.
