Treatment History and Summary

Patient:	Michael Townsend
Treating provider:	Rachel Reeves, DC
Diagnosis:	neck and back strain

Treatment history by month

Month and services	Visits	Charges
May 2025: evaluation	1	$339.39
June 2025: chiropractic adjustment, pain management, physical therapy	4	$1,222.35
July 2025: imaging, massage therapy, pain management, physical therapy	5	$1,263.50

Treatment summary

Patient presented following a sideswipe collision that occurred during a lane change, with complaints of neck and back pain consistent with a strain mechanism. The reported symptoms align well with the nature and force of the impact described. Examination revealed paraspinal muscle tenderness and reduced cervical range of motion, while neurological screening, reflexes, and motor strength remained within normal limits. No prior injury or treatment to the cervical or lumbar regions is known to this provider. Care consisted of ten visits including manual therapy, therapeutic exercise, and home stretching instruction, following a conventional course of conservative management. Symptoms improved steadily over the treatment period, and visit frequency was reduced accordingly as function returned. Billed services correspond to the documented visits, with no duplicate or repeated charges identified. Patient was discharged to self-directed home exercise with instructions to return if symptoms recur.
