Officer's narrative

Driver 1 was stopped in the right lane of the eastbound feeder road in Sugar Land, Texas, when the rear of the vehicle was struck by Dirver 2's sedan at a low rate of speed. Driver 1 is the named insured on the policy involved. A Psasenger seated in the front passenger position reported pain in the left wrist and was transported for evaluation. Officers confirmed the Passenger was present in the vehicle at the time of impact, and statements from both drivers agree on that point. No independent witnesses were located at the scene. Photographs taken by the responding officer show rear bumper displacement and a cracked taillight lens, which are generally consistent with the reported impact. The damage pattern appears largely in line with the force described by both drivers. A few faint scratches on the rear quarter panel may predate this collision, and the reporting officer noted them without attributing them to this event. The reported wrist injury is consistent with the mechanism of a sudden rear impact of this kind. Both drivers were cooperative, and no citations were issued at the scene.
