Officer's narrative

On the reporting date, I responded to a side-impact collision at an intersection in League City, Texas. Driver 1 was traveling through the intersection when Driver 2 entered from a crossing street and struck the driver's side of the vehicle. Driver 1 reported pain in the left shoulder at the scene and was evaluated before leaving. The injury described is consistent with the forces expected from this type of impact.

I examined the damage to both vehicles. The deformation and points of contact are largely consistent with the account given by both drivers. Scene photographs confirm several of the rpeorted details, including the final rest positions. I found no indication of prior damage to the vehicle involved.

No independent witnesses were located at the intersection. Passenger was seated in the front of Driver 1's vehicle, and both drivers and I confirmed this during the investigation.

Driver 1 stated that they reside with the registered owner of the vehicle, who is the policyholder, and I recorded this in my notes. Driver 2 was issued a citation for failure to yield the right-of-way.
