Treatment History and Summary

Patient:	Christopher Cox
Treating provider:	Joseph Bradford, DC
Diagnosis:	neck and back strain

Treatment history by month

Month and services	Visits	Charges
September 2024: evaluation	1	$254.69
October 2024: imaging, massage therapy, pain management	4	$1,716.21
November 2024: chiropractic adjustment, imaging, massage therapy, physical therapy	5	$1,407.87
December 2024: chiropractic adjustment, imaging, physical therapy	4	$1,562.02
January 2025: imaging, pain management, physical therapy	4	$1,935.39
February 2025: imaging, massage therapy, physical therapy	3	$720.76

Treatment summary

Patient presented following a low-speed head-on collision with complaints of neck and low back pain, consistent with the mechanism of injury reported. Initial examination documented restricted cervical range of motion and paraspinal muscle tenderness, while neurological screening and straight-leg raise testing were within normal limits. Imaging was not indicated based on clinical findings. The patient completed 21 supervised visits combining manual therapy, therapeutic exercise, and home program instruction. Course of care extended somewhat beyond the typical timeframe for a strain of this type, with gradual improvement in range of motion and pain scores over the treatment period. No prior injury or treatment to the cervical or lumbar regions is known. Billed services reflect the planned treatment plan, with no duplicated charges identified. Patient was discharged to self-management with return precautions provided. Prognosis for full recovery is good.
