Officer's narrative

On the afternoon in question, Driver 1 was completing a left turn at a Pearland, Texas intersection when the front of Driver 2's vehicle made contact with the rear quarter pnael of Driver 1's vehicle. Passenger was seated in the front passenger seat and was present in the vehicle at the time of the impact, as confirmed by both drivers and by the witnesses on scene. Driver 2 gave a statement that matched Driver 1's account of how the collision occurred. Two witnesses and the scene photographs are consistent with that sequence. The visible damage to the rear quarter panel and bumper corresponds to the impact described, and no earlier damage to Driver 1's vehicle was known to any party. Driver 1 reported neck and back strain and described significant pain. The impact appeared light, and the severity of the reported injury does not fit the force observed at the scene. Driver 1 is named on the auto policy covering the vehicle. No citations were issued at the scene.
