Treatment History and Summary

Patient:	Jose Conrad
Treating provider:	Ruben Clark, DC
Diagnosis:	neck strain

Treatment history by month

Month and services	Visits	Charges
March 2023: evaluation, imaging, massage therapy	3	$1,182.95
April 2023: chiropractic adjustment, pain management	2	$547.16

Treatment summary

Patient presented following a rear-end motor vehicle collision with complaints of neck pain and stiffness. The reported mechanism of injury is consistent with the force and direction of the impact. No prior injury to the cervical region is known from the patient history. Over five vistis the patient received conservative care including range-of-motion exercises, mnaual therapy, and home stretching guidance. Symptoms improved steadily, and visit frequency was reduced accordingly as the patient returned toward baseline function. Cervical imaging and physical examination findings clearly support a diagnosis of cervical strain. Billing review identified that one service was recorded twice on a single visit date. On inquiry, this office acknowledged the second entry was a duplicate of the first and has issued a correction. Patient is discharged from active care with instructions to return if symptoms recur.
