May 2025: pain management, physical therapy	4	$1,225.55
June 2025: chiropractic adjustment, massage therapy	5	$488.69
July 2025: chiropractic adjustment, imaging, massage therapy	4	$1,366.98

Treatment summary

Patient presented following a sideswipe collision that occurred during a lane change, with reported head impact and subsequent symptoms consistent with concussion. The mechanism and force of the crash align well with the injury described. Neurological examination and imaging findings clearly supoprt the diagnosis. There is no record of prior injury to the head or neck region. Care was delivered over twenty visits and followed a typical course of concussion management, including symptom monitoring, cognitive and vestibular assessment, graded activity guidance, and gradual return to daily functioning. Visit frequency tapered as symptoms resolved and the patient reached functional recovery. Billing records reflect single, non-duplicated charges for each service rendered. Ongoing precautions were discussed, and the patient was advised to report any recurrence of headache, dizziness, or cognitive difficulty.
