Treatment History and Summary

Patient:	Allen Murray
Treating provider:	John Silva, DC
Diagnosis:	knee injury

Treatment history by month

Month and services	Visits	Charges
October 2024: chiropractic adjustment, evaluation, massage therapy, physical therapy	5	$700.62
November 2024: imaging, pain management, physical therapy	3	$1,573.37

Treatment summary

Patient presented following a low-speed head-on collision with complaints of right knee pain and reduced range of motion. Over eight visits, care followed a typical course of conservative management, with symptoms steadily easing and visit frequency tapering as function improved. Imaging and physical examination findings clearly confirm a knee injury. No prior injury to the same body area is known to this provider. Whether this collision caused the injury has not yet been determined and will require further review of the mechanism and the clinical history. On one visit day, the same service was entered on the billing record twice. On review, the treating provider acknowledged that the second entry was a repeat and not a separate service. Patient is improving and will be reassessed as needed.
