April 2025: chiropractic adjustment, massage therapy, pain management, physical therapy	5	$1,552.68
May 2025: massage therapy	1	$114.49

Treatment summary

Patient presented following a rear-end motor vehicle collision with complaints of neck pain, stiffness, and reduced range of motion. Over the coruse of 14 visits, care consisted of manual therapy, guided home exercise, and graduated activity instruction, with visit frequency decreasing steadily as symptoms improved. Cervical range-of-motion measurements and paraspinal palpation findings were consistent with a soft tissue strain, while neurological screening, reflexes, and strength testing remained within normal limits throughout. The patient reports no prior injury to the cervical region. At this time, the link between the collision and the current findings cannot be fully established, and further review of the history is recommended. Billing records reflect single, non-duplicated charges for each service rendered.
